Part 10—Scoping

42—Object of Part

The object of this Part is to establish a scheme that, in relation to mining leases, retention leases and miscellaneous purposes licences—

- (a) provides the holders of a relevant tenement an opportunity to obtain greater certainty with respect to government and community expectations as to the scope of work and the level and extent of assessment relating to environmental impacts that are relevant to their authorised operations or proposed authorised operations, including by taking the initiative through the preparation and provision of scoping reports; and
- (b) provides for projects to be categorised according to their level of potential environmental impacts and assigned to assessment pathways that are appropriate in their particular circumstances, after taking into account information and other material provided in or in connection with scoping reports; and
- (c) ensures that project assessments are commensurate with the level of environmental impacts after taking into account project type, scale, duration and the sensitivity of the location of mining and ancillary operations; and
- (d) ensures that projects are assessed within a scheme that promotes efficiencies, transparency and clarity as to approval pathways and technical assessments.

43—Interpretation

In this Part—

designated person means—

- (a) the holder of a mineral tenement that may lead to a relevant tenement; or
- (b) an applicant for a relevant tenement; or
- (c) an applicant for an approval to make a change in operations;

relevant tenement means a mining lease, a retention lease or a miscellaneous purposes licence.

44—Application of Part

This Part may apply in relation to a particular project even if an application is yet to be made for a mining lease, retention lease or miscellaneous purposes licence.

45—Scoping report

- (1) The purpose of a report under this Part (a *scoping report*) is to gather, develop, assess and provide, to such extent as may be reasonable and relevant, information relating to 1 or more of the following:

 - (d) determining the extent of work required to be undertaken for the purposes of environmental impact assessment as part of the consideration of an application for a relevant tenement or change in operations;
 - (e) if it is relevant in the circumstances or is reasonable or appropriate to do so—determining the impacts of a relevant tenement or change in operations on people or communities, including by providing information about the measures that are to be used to manage, limit or remedy those impacts (in the case of negative impacts), or to facilitate or ensure those impacts (in the case of positive impacts).
- (2) A designated person may provide a scoping report to the Minister at any time that is reasonable and appropriate.
- (3) The Minister may require a designated person to provide a scoping report if such a report has not been provided by the designated person.
- (4) A scoping report—
