Schedule 1—Forms

Form 2—Prescribed oral advice

(Section 47E(4)(ab) of Act)

Road Traffic Act 1961

Oral advice on refusal or failure to comply with alcotest or breath analysis direction: section 47E(4)(ab)

It is a criminal offence to refuse or fail to provide a breath sample without good cause. You could be fined and lose your licence for 12 months or more.

It is a defence if you have some physical or medical condition that prevents you from providing a breath sample, but only if you ask for a sample of your blood to be taken instead or can show that your condition also prevents the taking of blood.

If you want a blood sample taken because of your condition, you should ask for that and the police will help you to have the sample taken at Government expense.

Form 3—Prescribed oral advice

(Section 47EAA(10)(b) of Act)

Road Traffic Act 1961

Oral advice on refusal or failure to comply with drug screening test, oral fluid analysis or blood test direction: section 47EAA(10)(b)

It is a criminal offence to refuse or fail to provide a sample of oral fluid or blood without good cause. You could be fined and lose your licence for 6 months or more.

It is a defence if you have some physical or medical condition that prevents you from providing a sample of oral fluid or blood [whichever is applicable], but only if you ask for a sample of your blood or oral fluid [whichever is applicable] to be taken instead.

If you want a sample of blood or oral fluid [whichever is applicable] taken because of your condition, you should ask for that and the police will help you to have the sample taken at Government expense.

Form 4—Prescribed oral advice and written notice

(Section 47K(2a)(a) of Act)

Part A—Oral advice for the purposes of section 47K(2a)(a) of *Road Traffic Act 1961*

The breathalyser reading just taken shows that you had a prohibited level of alcohol in your blood.

Therefore, it appears that you have committed an offence against section 47B(1) or (1a) of the *Road Traffic Act 1961*.

In any court proceedings for an offence against section 47B(1) or (1a), or for an offence against section 47 of the Road Traffic Act (driving under the influence of liquor), it will be presumed that the breathalyser accurately indicated your blood alcohol level at the time of the reading and for the preceding 3 hours. However, the Road Traffic Act allows for contrary evidence based on the results of a blood test.

If you want to have such a blood test you will have to make your own arrangements and follow certain procedures, using a special blood test kit. This blood test kit will be supplied to you on your signing a written request.

If you obtain a blood test kit and want to have your blood tested, you should take the kit promptly to a hospital, medical practitioner or registered nurse in order to have a sample of your blood taken.

You must not consume any more alcohol before having a sample of your blood taken and must not open the blood test kit before delivering it to a medical practitioner or registered nurse.

Under the blood test procedure, the sample of blood is divided and sealed in two containers. You will have to sign a form that will be given to you by the medical practitioner or registered nurse.

One of the sealed containers will be given to you and you may make your own arrangements to have the blood in that container analysed.

In any event, the blood in the other container will be analysed by Forensic Science SA and you will be given written notice of the results of the analysis.

Further information as to these matters is contained in the written notice which will be delivered to you shortly.

Part B—Written notice for the purposes of section 47K(2a)(a) of *Road Traffic Act 1961*

Operation of Road Traffic Act in relation to results of breath analysis

1 Offence

Section 47B(1) of the *Road Traffic Act 1961* provides that a person commits an offence if the person drives a motor vehicle, or attempts to put a motor vehicle in motion, while there is present in the person's blood the prescribed concentration of alcohol (as defined in section 47A of the Act). Section 47B(1a) provides that if a person engages in conduct involving a motor vehicle that constitutes an offence against section 47B(1) (other than a category 1 offence) while a child under the age of 16 years is present in or on that motor vehicle, the person commits an offence against section 47B(1a) and is liable to the same penalty as is prescribed for an offence against section 47B(1).

2 Breath analysis

Your breath has just been analysed by means of a breath analysing instrument which indicated that the prescribed concentration of alcohol was present in your blood. Accordingly, it appears that you have committed an offence described above.

3 Legal effect of breath analysis result

In proceedings for an offence described above or an offence against section 47(1) of the *Road Traffic Act 1961* (driving under the influence of liquor), the result of the breath analysis will be presumed to accurately record the concentration of alcohol in your blood at the time of the analysis and throughout the preceding 3 hours (section 47K(1), (1ab)).

In any proceedings against you for such an offence, you will be able to challenge the accuracy of the breath analysis reading if—

- you have a sample of your blood taken and analysed as described below; AND
- the result of analysis of the blood sample shows that the breath analysing instrument gave an exaggerated reading of the concentration of alcohol present in your blood (section 47K(1a)).

Procedures for optional blood test

- 1 You may have a sample of your blood taken and analysed if you wish.
- 2 For that purpose, you must request the breath analysis operator to supply you with an approved blood test kit (you must sign a written request form for the kit and should retain a copy of the signed request form).
- 3 You should then proceed promptly to a hospital, medical practitioner or registered nurse of your choice and request that a sample of your blood be taken (using the blood test kit).
- 4 Do not consume any further alcohol before the sample is taken.
- 5 Do not open the blood test kit.
- 6 The medical practitioner or registered nurse taking the sample of your blood will divide it and place it into two containers and seal the containers. One container will be delivered to you—do not break the seal on this container.
- 7 Sign the form presented to you by the medical practitioner or registered nurse—the original of the form will be given to you which you should retain.
- 8 You may, if you wish, have the blood sample (in the container delivered to you) analysed at a laboratory to determine the concentration of alcohol present in the blood.
- 9 The other blood sample container will, in any event, be sent to Forensic Science SA where the blood will be analysed. The results of this analysis will be sent to you at your address (as indicated on the form presented to you by the medical practitioner or registered nurse who took the blood sample).
